Inspired by the movement of the seabed, **Arturo Alvarez's** Mytilus features waves that create its circular, organic forms. Made of painted stainless-steel mesh, the collection comes in four varieties. [A-EMOTIONALLIGHT.COM](http://A-EMOTIONALLIGHT.COM)

2

**Eurofase Lighting's** Glenview suspends six LED rings combined to resemble a cube from one of its corners to form a slight diamond shape. Its open-caged design creates patterns resembling petals and butterfly wings. [EUROFASE.COM](http://EUROFASE.COM)

3

**Arteriors' Eva** chandelier showcases a more vertical configuration than the conventional sputnik shape of its kin. The antique brass steel fixture includes 24 arms that extend from its orb center, which is finished in a contrasting ivory enamel. [ARTERIORSHOME.COM](http://ARTERIORSHOME.COM)

4

Calling to mind Bohemian glass cutting and luminous street signage, the light from **Vibia's Guise** fixture emanates from its glass structure, keeping the actual source invisible. When switched off, the glass' transparent quality is highlighted. [VIBIA.COM](http://VIBIA.COM)

5

**Articolo** has introduced new elongated extensions for its Trilogy collection, making the fixtures ideal for site-specific placements. Initially conceived as a pendant, the collection can house up to 12 glass orbs, with each sphere given a floating appearance. [ARTICOLOLIGHTING.COM](http://ARTICOLOLIGHTING.COM)

**Sonneman – A Way of Light**’s Cubix lighting system brings scalability, volume, and constructive interest. Arranged in precisely interconnected relationships, the suspended cubes are joined by a shared leg on each frame. [SONNEMANAWAYOFLIGHT.COM](http://SONNEMANAWAYOFLIGHT.COM)

7

The alluring and chic Leo pendant from **Global Views** features 10 hanging bulbs and pairs hand-polished natural quartz crystal with soft satin brass. [GLOBALVIEWS.COM](http://GLOBALVIEWS.COM)

8

Named after the goddess Mother Earth, **Yellow Goat Design**’s Gaia fixture holds up glistening LED neon strips inside shell-like forms. Clear laser-cut acrylic blades reflect the movement of the embedded light sources. [YELLOWGOATDESIGN.COM](http://YELLOWGOATDESIGN.COM)

9

Inspired by Chinese rice lamps, **AMEICO**’s 360-degree Knit-Wit features a knitted materiality that distributes light through the yarn’s pattern, making each individual lamp distinct. [AMEICO.COM](http://AMEICO.COM)

10

A sphere delicately sits atop a cylinder for **Atelier Alain Ellouz**’s Athena lamp, which evokes the Earth’s orbit around the sun as its soothing translucent light unveils patterns in the alabaster shade. [ATELIER-ALAIN-ELLOUZ.COM](http://ATELIER-ALAIN-ELLOUZ.COM)
